

Tiny Turtles

Our little ones are getting bigger everyday! It seems like they are learning new things and discovering more about the world around them in every second!

This past month our class has learned about In and Out and Open and Shut.

We have done lots of art projects and collages!

We have also enjoyed the sand table and some new toys that our class has recently acquired.

During the month of August, our class will be learning about airplanes and things that go!

It is fun to discover that we can “go” to, by using different parts of our bodies. We can use our bodies to do many different things!

There’s lots of art activities and discovery awaiting us!

We look forward to this month of fun and activities!!
